Education

University of Prishtina *BSc in Information and Communication Technologies* Oct 2022 - Present
Bedri Pejani Gymnasium *High School Diploma in Natural Sciences* Sep 2019 - May 2022

Experience

Founder *Cyphera* June 2025 - Present

- Founded company specializing in web development solutions for small and medium businesses
- Established Hack&Stack community with 70+ members for sharing opportunities, projects and collaboration

Atomist *Atomi Institute* Jul 2019 - Present

- Selected for competitive program for exceptional IQ students
- Participated in advanced academic workshops and enrichment programs beyond standard curriculum

Awards & Achievements

Erasmus+ Mobility *Saxion University of Applied Sciences, The Netherlands* February 2026

- Collaborating with international team to build a platform (In active development)

1st Place - Engineering Category *Creative and Innovative Projects - MASHTI* December 2025

- Led team of 4 in developing IoT-based elder care monitoring system using Raspberry Pi
- Implemented machine learning algorithm for real-time fall detection and emergency alert system
- Integrated automated alarm notifications to caregivers during critical events

Erasmus+ Project IoT-ECO *Technical University of Sofia, Bulgaria* September 2025

- Collaborated with international team to build smart medical room simulation using Microsoft Azure
- Developed IoT monitoring dashboard for real-time device telemetry and health metrics tracking
- Implemented automated response system to detect dangerous values and schedule maintenance interventions

Certifications & Training

Girls in Cybersecurity *ICK — DevelopHer x LuxDev* Jan 2025 – Jun 2025

- Completed six-month intensive training covering Cyber Security Fundamentals, Offensive/Defensive Security, and Red Teaming
- Advanced topics included penetration testing, incident response, threat monitoring, forensic investigation, and AI/ML security applications

Full-Stack Web Development *Coder's Hub* Feb 2024 – Jun 2024

- Comprehensive training in HTML5, CSS3, JavaScript, PHP, and MySQL
- Built complete web applications using Laravel framework with MVC architecture

Web Fundamentals *jCoders Academy* Sept 2021 – Sept 2022

- Foundation training in HTML5, CSS3, responsive design, and modern web development principles

Artificial Intelligence Basics *British College of Sciences by PBCA* Apr 2022 – Jun 2022

- Introduction to AI concepts, machine learning algorithms, and Python libraries
- Completed practical projects involving classification, regression, and data visualization

Leadership Training *YMCA Kosovo*

Jan 2021 – Dec 2021

- Completed leadership development program focusing on team management, communication, and project planning
- Participated in community service projects and developed public speaking skills through workshops

Projects

Atheneum - Study Productivity Platform

Mar 2026

- Built a full-stack study productivity platform featuring a Pomodoro timer, study scheduler, Kanban board, and AI-powered Study Vault with automatic summaries and quiz generation
- Architected fully on Cloudflare-native infrastructure (Pages, Workers, D1, R2, KV, Workers AI)
- Live: atheneum.app — Tools Used: Remix, TypeScript, Cloudflare Workers, Workers AI, Tailwind CSS

Literas - Learning Management System

Aug 2025

- Developed full-featured LMS with separate student and admin portals for course management
- Successfully deployed in multiple schools in France with plans for commercial licensing
- Live: literas.app — Tools Used: Next.js, Tailwind CSS, APIs, Authentication

E-Studenti - Open Source Educational Platform

Jul 2025

- Built free open-source platform providing university materials for all faculties at University of Prishtina
- Developed using Next.js and Tailwind CSS with strong visitor engagement metrics
- Implemented email submission system for community-contributed educational resources
- GitHub: [E-Studenti](https://github.com/E-Studenti) — Live: e-studenti.com

Customer Service Bot

Jun 2025

- Built AI chatbot using RAG pipelines and vector embeddings for intelligent customer support
- Implemented decision tree logic for intent classification and contextual query routing

Library E-Commerce Website *Kopertina*

Feb 2024 - Aug 2024

- Developed backend system with automated invoicing that generates and emails customer invoices
- Built book catalog database with user data processing and email automation workflows

Aniverse - 3D Animation Competition *Kubi Studios*

Nov 2023

- Co-organized regional 3D animation competition with 25+ participants and 10 finalists
- Facilitated networking opportunities between industry professionals and emerging talent

Technologies

Languages: JavaScript, PHP, C++, Python, SQL, Bash

Web Technologies: HTML5, CSS3 and Tailwind, JavaScript and frameworks, MySQL and PostgreSQL

Security Tools: Nmap, Metasploit, Wireshark, Burp Suite

Other: Git, Linux, LaTeX, XAMPP, Microsoft Office, Cloudflare
